

## Lab 8 Worksheet

1. We have uploaded a sample project on moodle. Extract and import the project into the eclipse workspace. The handout is also uploaded on how to import the project.
2. The project has been written using jsp/servlet. It takes student details from the jsp file and adds to the database using servlet. Then displays the success message on the jsp file.

(Note : In the servlet code ,add your database name,postgres username and password correctly in the jdbc url)

3. Execute the project and understand the execution flow.
4. There will be a home assignment for tomorrow's lab which will be available at 2:30 pm tomorrow on moodle.
